

FGRiD

ENVIRONMENTAL POLICY

FGRiD is committed to continuously strive to meet the growing demands of its customers, while improving its environmental performance in all its activities with the scope of "Renewable Energy Licensing & Construction Services".

Each employee must, by making use of the training provided and the means made available to him/her, adhere to the Environmental Management System Procedures and contribute to its continuous consolidation and improvement with the aim of protecting the environment.

In particular, our Company is committed to the following:

- comply with the applicable environmental legislation and regulatory framework,
- recognize all environmental aspects arising from the conduct of its activities and control those that cause significant environmental impacts,
- establish, document and review its environmental objectives and targets, taking into account significant environmental parameters, technological developments, economic and operational requirements,
- manage its waste in accordance with environmental permits and applicable legislation and communicate these requirements to its respective Suppliers,
- act promptly to prevent any risk of accidental pollution or other major accidents,

- come ready with immediate response and intervention plans for emergency situations,
- motivate its staff and suppliers to meet basic environmental protection criteria,
- manage environmental risks properly through the application of proactive measurement, systematic monitoring, analysis and assessment,
- manage threats and opportunities related to identified environmental aspects
- continuously train all personnel whose work in any way affects the Environmental Management System on environmental issues and their respective responsibilities,

- take into account the principles of sustainable development,
- aim to build and maintain a relationship of trust with the local community and provide environmental information to the general public,
- meet the expectations of stakeholders,
- review and amend its Environmental Policy on a regular basis and make it available to the public.
